Cable Lock 500

Strong, Adjustable Barrier and Semi Barrier Cable Seals

ISO/DIS17712.2 Compliant · C-TPAT Compliant

The Cable Locks are user-friendly and highly tamper-evident. They are available with different cable diameters to secure various applications with different security requirements.

The seals are secured once the wire passes through the one-way locking mechanism. It must be adjusted to fit tightly to the application to maximize security and prevent tampering.

Our Cable Locks seals are widely used on trucks, tanker trucks, and air cargo containers, shipping containers, rail cars calibrators and valves across various industries.

Features

- 1 The body is designed with a rib pattern, which protects markings during rough handling.
- 2 The Cable Lock's one-way locking mechanism provides fast and easy sealing.
- 3 One end of the cable is permanently secured into the locking body.
- 4 The Cable Lock is anodized in solid colours, which accommodates customized laser marking. Anodizing also makes colour coding possible and eases identification from a distance.
- 5 All Cable Locks are etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.

Technical Specifications

PRODUCT

Product Code	Material	Cable Length	Cable Diameter	Pull Strength	Marking Area	Max Marking Digits
Cable Lock 500	Body: Aluminium Cable: Mild steel wire	250 mm (std)	Ø 5.0 mm	1500 kgs	Body: 3.0 x 3.6 cm	15
